Technical test log and release observations

AgriSoko Pocket G13 | INES Ruhengeri | 23 October 2026

Repository: https://github.com/nzerneste250/agrisoko-pocket-g13

Release: https://github.com/nzerneste250/agrisoko-pocket-g13/releases/tag/v1.0.0

Automated backend tests: PASSED

Earlier recorded pytest run: 54 passed. Covered schema validation, matching, no-match, thresholds, aliases, deterministic behavior, index metadata and API routes.

Eleven actual localhost HTTP checks passed across the required FastAPI endpoints. Recorded evaluation: 12/12 identity queries matched and 5/5 deliberate no-match queries rejected. This is not validation of unseen skill or feature claims.

Mobile development checks: PASSED

Reported later mobile test suite: 25 checks passed; earlier checks of 6 and 10 tests also passed during development. TypeScript passed; Expo Doctor passed 20/20; Android JavaScript export passed.

Four sync-script tests were reported passed. These historical results were not independently re-executed while preparing this document.

Android build and physical device: PARTIAL

EAS build c780dde1-d2c6-4784-96a0-8e195a8d8e36 produced the APK according to the build/release and user-provided logs. APK: AgriSokoPocket_G13.apk, 68,902,179 bytes, SHA-256 f54de6242dd259b68005707c1a186a5e9f7b08493bb87679af1ff614c4a1faee.

Physical phone screenshots support installation, launch and rendering of several screens.

Phone-to-API request: FAILED (fetch request canceled). Complete offline lookup behavior, full recovery flow, two-device matrix, independent testers and signed records: NOT VERIFIED.

Open risks and final status

npm audit reported 15 high-severity affected dependency nodes; remediation unverified.

Automated tests passed as recorded; it would be inaccurate to state every required test passed. Final acceptance and evidence requirements remain incomplete.
